

SAFETY EQUIPMENT

Wire Mesh Deck

Allows for neat and orderly visual identification of inventory and reduces dust accumulation. Wire Mesh Deck improves fire safety by allowing smoke to rise and water from sprinklers to fall. Acts as a safety net for hand-loaded items as well as for misaligned or broken pallets. A cleaner, more sanitary option while improving illumination of warehouses. Powder coated grey finish with easy clip-on installation. Custom sizes and designs available.

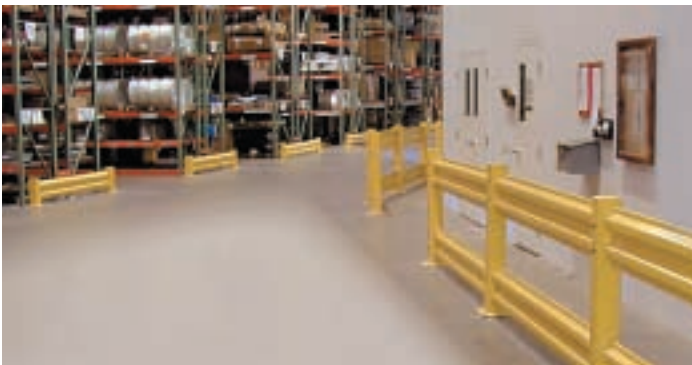

Flared Step Channel

Stock Sizes

Part No.	Size	Capacity	Weight	Grid	Gauge	Channels	Style

Additional sizes, styles, and types are available.

Guardrails

Guardrails protect racking and shelving, in-plant offices and walls from collision damage. They are able to withstand a 10,000 lb. load from breaking through at 4 mph. Safety features include security caps on all posts, bolted connections and a durable powder-coated safety-yellow finish. Also available are rack-post protectors, bollards and single or double rail barrier guardrails.
