

METALSISTEM SHELVING

SUPER 1/2/3

These fully adjustable shelving systems are for light to medium duty storage. The easy-to-assemble patented boltless shelving system allows for expansion with add-on units or our variety of accessories. The attractive high tech finish is made from high quality zinc coated steel with elevated corrosion resistance. Sold unassembled with assembly instructions.

SUPER 4/5/6 – REQUEST A QUOTE

Super 4/5/6 is a completely adjustable storage system made from high quality tensile steel. This system maximizes medium to heavy-duty warehouse storage and holds a capacity of up to 35,200 lbs. Highly suitable for mezzanines and catwalks due to the countless shapes and forms that can be created.

Super Inox – REQUEST A QUOTE

This stainless steel shelving is well-suited to meet hygienic standards in refrigerated applications, kitchens and food prep areas. Super Inox is also suitable in pharmaceutical and corrosive chemical processing labs. The high tech finish provides an attractive modern look for retail and interior design applications. Super Inox is adaptable to any dimension and countless configurations.

Unirack – REQUEST A QUOTE

Unirack is a fully adjustable storage system that allows for endless possibilities, from shelving to modular containers, hanging products, and tire racking. The boltless frame high tensile steel construction makes it ideal for seismic areas. This system is designed for light to medium duty storage and allows for easy use of dividers, drawers and other accessories. With a capacity of 10,560 lbs. per frame Unirack is highly suited for mezzanine and catwalk structures up to three tiers.
