

MEZZANINES

Structural Mezzanines

Custom-designed to suit your needs, these mezzanines have a modular design that allows you to reconfigure for future growth and ensures easy assembly/disassembly.

Standard handrails are available in 2-rail, 3-rail or welded mesh with kickplate design. Staircases are assembled easily with nut and bolt connections and along with handrails meet the following codes; BOCA, IBC, OSHA, UBC and CNBC. Swing or slide open gates put a safety barrier between employees and dangerous free fall areas.

Decking material is available in a variety of finishes such as:

- 2" galvanized open steel planking
- 1 1/2" steel deck with plywood, OSB or composite resin board overlay
- Open steel bar grating
- Diamond plate with 1 1/2" steel deck
